

## DC 81 series

### High Performance DC Filter Capacitor Small Plastic Box Case

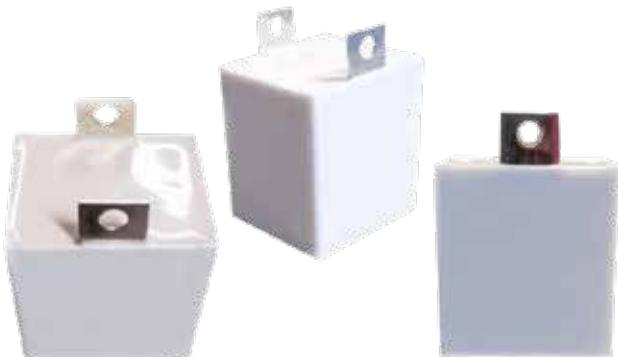

DC 81 Capacitors are the ideal solution as DC filter for power electronic applications requiring high current capability and small size designed for mounting on print circuit board. It provides to customers a modular solution on which to develop and scale their projects. In addition, the construction with internal wound element made with special metallized film, very low internal self-inductance and potted with resin in self-extinguish plastic case give a superior capacitor type with very high stability and reliability performance.

Main characteristics:

- Self-Healing Metallized Polypropylene Film
- Small size, very low ESL
- Modular solution
- Self-extinguish Plastic Case
- DRY Self-extinguish Resin filling

Main applications:

- DC – Link Filtering
- Wind and Solar Power Applications
